Titustown Water and Sewer Replacement

March 14, 2012

Titustown Pump Station Construction Nears Completion Second Phase of Water and Sewer Replacement Progresses

Dear Valued Customer,

The City of Norfolk Department of Utilities is pleased to inform you that the pump station construction is finished and undergoing service testing. Phase 2 of this project, shown in the red-shaded area, is underway and on schedule for the replacement of the water and sanitary sewer pipes along Diven Street.

The City's contractor, Tidewater Utility Construction Inc., started in the area north of Little Creek Road and is expected to move their construction south of Little Creek Road in May.

During this time, access will be maintained with flaggers within the work zone and detours for thru-traffic. Phase 2 is expected to be complete by Spring 2013.

The construction of Phase 3, shown in the blue shaded area, is currently under design and construction has not yet been scheduled. City staff will be providing more information as details become available.

We look forward to completing this project, which will enhance your water and sewer services for many years to come. If at any time you have questions or concerns, please do not hesitate to contact the City's on-site construction inspector, Calvin Lillard. He can be reached by cell phone at 813-5451 to respond quickly. You may also contact the Project Manager, Megan White, at 664-6540.

Sincerely,

Kenneth R. Turner, P.E.
Engineering Manager
